

## Attach the Hasselback

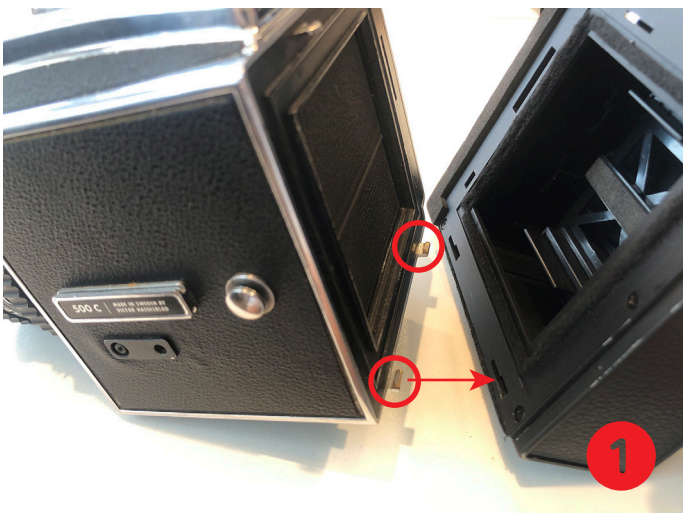

Due to the unique mechanical design of the Hasselblad camera, we kindly ask you to review the following steps before installing your Hasselback.

 **Please ensure that the gears and ejecting hook of your Hasselback is in its original position. If it is not, please rotate the eject knob/crank until the hook returns to its original position.**

**How to return the gears and ejecting hook to its original position**

- Advance your Hasselback Camera.
- Press the shutter (\*\*\*) Make sure the camera body doesn't protrude any gears or metal parts\*\*\*)

**I. Align the camera body latch with the small hole on the Hasselback, keeping the angle parallel.**

 **Do not install the hasselback and camera at a large angle, as this may damage the body latch**

2. Slide the Hasselback until you hear a "click" sound.

Check the alignment between the Hasselback and your Camera. And the Ejecting hitch is in the original position before shooting.
